

Configure & Connect

Follow the steps below to install, connect, and configure Cisco AnyConnect on your PC.

The remote connection to the VPN is done using an application called Cisco AnyConnect. You can install this application by visiting the Downloads page in MyDTT[™] (<u>www.</u> <u>mydtt.com/pages/downloads</u>), then clicking AnyConnect (Windows).

Run the application. It will prompt you through the installation process.

After the Cisco AnyConnect app has finished installing, run the program now available in the start menu.

Programs (1)	
Scisco AnyConnect Secure Mobility Client	<u>~</u>

It will ask you to enter the web address (vpn.mydtt.com).
